Design Construct Develop

holyholds

Climbing holds inspired by nature, interpreted by modern technology.

The Spirit of Rock.

All team members of DCD are avid alpinists and climbers. We encourage the development of climbing in many different ways. Because of this our products and services result from an innovative design process and reflect the fascination of climbing.

The benefits of DCD holds:

- Safety during operation, durable functionality and economical maintenance.
- Innovation and continuous development ensures our customers long-term happiness and success.

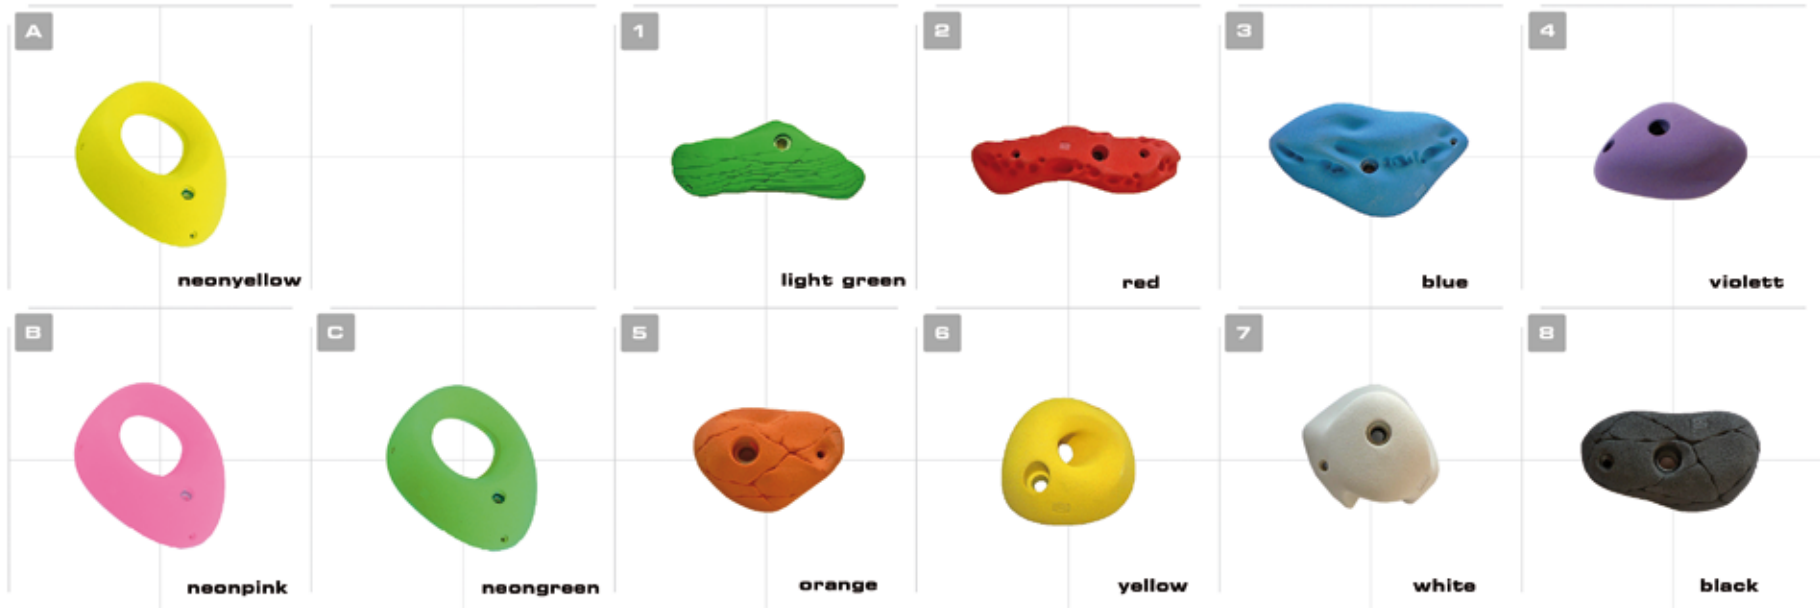

colors & sizes

Information: The limits between the sizes are not strictly fixed and in some cases the correspondence is approximate.

Our holds are available in **8 different standard colors** and **3 special neon colors**.

Safety holds

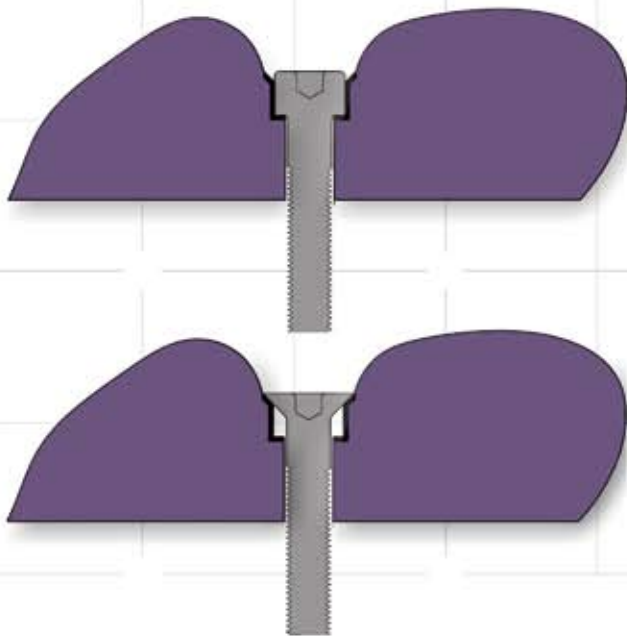

Safety holds technology

SPS - shatter protection system is tested safety. Our holds from size L on are only available with SPS. A metal grid is cast as a reinforcement. The risk of holds or parts of it falling down in your climbing gym is almost impossible.

Universal bolt insert

Our holds are equipped with an universal screw insert and suitable for cylinder head and countersunk screws.

Universal bolt insert

Safety hollow shapes

Holds with large volume (MEGA and more) are produced hollow. Thereby material and weight is saved with equal resistance. The fractions of the holds are prevented from falling down in the case of damage.

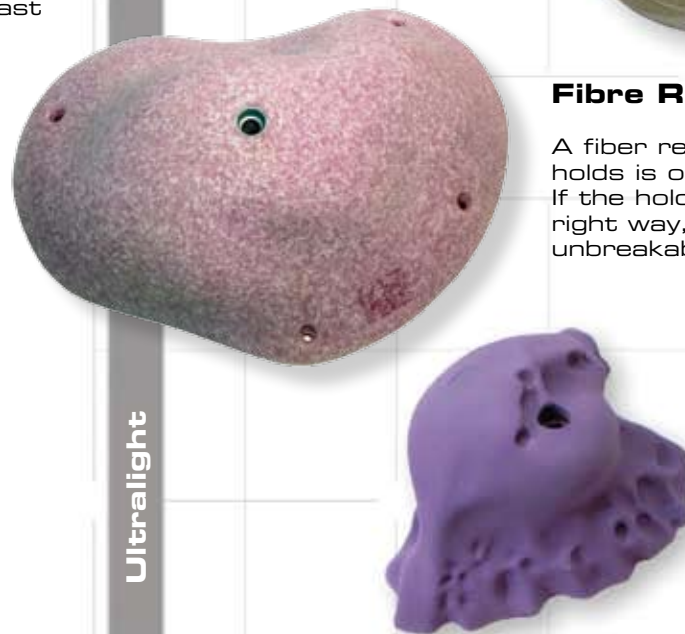

Safety hollow shapes

Fibre Reinforcement

A fiber reinforcement of the holds is optionally available. If the holds are installed in the right way, our holds are unbreakable!

Ultralight

Ultralight

By using special resins up to 60% weight are saved.
